In a lot of ways lay reminded Colman of himself when he was a lot younger. Colman had acquired his name from a professional couple who adopted him when he was eleven to provide company for their own son, Don, who was two years older. They hadn't wanted to disrupt their careers by having another child of their own. Colman's stepfather was a thermodynamics engineer involved with heat exchangers in magnetohydrodynamics systems, which accounted for Colman's early interest in technology. Although the Colmans had done their best to treat both boys equally, Steve resented Don's basic schooling and was jealous when Don went to college to study engineering, even though he himself had then been too young W do the 'same. The rebelliousness that" had contributed W Steve's being placed in the home for wayward adolescents from which he had been adopted reappeared, resulting in his giving the couple some hard times, which upon reflection he felt bad about. For some reason that Steve didn't understand, he felt that if he could help Jay realize his potential and use the opportunities he had, it would make up for all that. Why, he didn't know, because nothing he did now could make any difference to the Colmans, who were probably old and gray somewhere, but he felt he owed it to them. People's minds worked like that. "He said earlier tonight that if the Chironians have started an army, it's probably a good thing because it'll save us the time and effort of having to show them how. What we need to do is show them we're on their side and get our act together for when the Pagoda shows up." The EAF starship was designed differently from the Mayflower II. To compensate for the forces of acceleration, it took the form of two clusters of slender pyramidal structures that hinged about their apexes to open out and revolve about a central stem like the spokes of a partly open, two stage umbrella, for which reason it had earned itself the nickname of the Flying Pagoda. Terry sipped her drink and looked around the table. "The guy's got it figured realistically. You see, there's no need for a fight. What we have to do is turn them around our way and straighten their thinking out." "you can throw them away, little mouse. Only you." "The fighting at Vandenberg looks as if it's being contained," he announced. - "Two pockets of our guys are holding out at Bays One and Three, but the rest are cooperating with the regulars. The regulars have pretty well secured the whole module already. Stormbel won't be getting any help from the surface through there." "That's the current story," Leilani said, "and we're sticking to it. Strange lights in the sky, pale green. ON THE DAY officially designated December 28, 2080, in the chronological system that would apply until the ship switched over to the Chironian calendar, the Mayflower 11 entered the planetary system of Alpha Centauri at a speed of 2837 miles per second, reducing, with its main drive still 'firing at maximum power. The sound of twisted steel scraping across the outside of its hull reverberated throughout the module's stem section as one of the feeder ramps, none of which was retracted, first bent, and then crumpled. The ramp tore open halfway along its length at a section that had been pressurized, spilling men and equipment out into space. The lucky ones-the ones who were wearing suits-could hope to be located through the distress-band transmissions from their packs. The others had no time to hope in the instant before their bodies exploded..Kalens had argued a case to the effect that Wellesley could, which had been concocted by a couple of lawyers that he had spoken to a day previously. At the same time, however, the lawyers had cautioned that the issue would be subject to a ruling by the Judiciary, and Kalens had come in an endeavor to obtain in advance from Fulmire an intimation of the likely verdict, hinting that a favorable disposition would not go forgotten in times to come. The endeavor' had backfired spectacularly.. "Yeah," Noah acknowledged without enthusiasm..his lips, blinking grains from his eyelashes, Curtis pushes up onto his knees. "It would have been ~zero the other way."..HOWARD KALENS SAT at the desk in the study of his villa style home, set amid manicured shrubs and screens of greenery in the Columbia District's top-echelon residential sector, and contemplated the porcelain bottle that he was turning slowly between his hands. It was Korean, from the thirteenth-century Koryo dynasty, and about fourteen inches high with a long neck that flowed into a bulbous body of celadon glaze delicately inlaid with mishima depicting a willow tree and symmetrical floral designs contained between decorative bands of a repeated foliose motif encircling the stem and base. His desk was a solid-walnut example of early nineteenth-century French rococo revival and the chair in which he was sitting, a matching piece by the same cabinetmaker. The books aligned on the shelves behind him included first editions by Henry James, Scott Fitzgerald, and Norman Mailer; the Matisse on the wall opposite was a print from an original preserved in the Mayflower II's vaults, and the lithographs beside it were by Rico Lebrun. And as Kalen's eyes feasted on the fine balance of detail and contrasts of hues, and his fingers traced the textures of the bottle's surface, he savored the feeling of a tiny fraction of a time and place that were long ago and far away coming back to life to be uniquely his for that brief, fleeting moment..care. Bernard stared with a mixture of uncertainty and resentment. "I think I know what's going through your mind," she told him. "But don't worry about it. We don't take orders from Farnhill or Merrick here. Hoskins doesn't have a lot of experience with high-flux techniques yet, and Walters is good but careless with details. If the people here were going to accept anybody new, it would be somebody who knew what they were doing and who didn't leave anything to chance, however tiny."..pure sulfur in the Satanic gardens of Hell.. Yet right up until the minute she decided she needed a change, until she threw."They're messing us around," General Johannes Borstein, Supreme Commander of the Chiron Expeditionary Force--the regular military contingent aboard the Mayflower II--told the small group that had convened for an informal policy discussion with Garfield Wellesley in the Mission Director's private conference room, located in

the upper levels of the Government Center in the module known as the Columbia District. His face was sallow and deeply lined, his hair a mixture of grays shot with streaks of black, and his voice rasped with a remnant of the guttural twang inherited from his South African origins. "We've got two years to get this show organized, and they're playing games. We don't have the time. We haven't seen any evidence of a defense program down there. I say we go straight in with a show of strength and an immediate declaration of martial law. It's the best way." After the dog. Kalens smiled at the frown on Celia's years old. In the vision that the old doom doctor had, the one where he claimed he saw us being healed. Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others. perch, the dog cocks his head left, then right, makes a pathetic sound of anxiety, stifles the whine as. Communications between Earth and the Kuan-yin had been continuous since the robot's departure in 2020, although not conducted in real-time because of the widening distance and progressively increasing propagation delay. The first message to the Chironians arrived when the oldest were in their ninth year, which was when the response had arrived from Earth to the Kuan-yin's original signal. Contact had continued ever since with the same built-in nine-year turn-round factor. The Mayflower II, however, was now only ten light-days from Chiron and closing; hence it was acquiring information regarding conditions on the planet that wouldn't reach Earth for years. cymbal-like ping off range hoods and off other metal surfaces, slamming?thwack! into wood or. It happened because people had forgotten that we all have our proper places in the order of things and our proper functions to perform. They allowed too many people who were unqualified and unworthy to get into positions that they hadn't earned." filtered cacophony into a muted clump-and-crackle.
